VANS to run on BIO-FUEL

If you smell fish and chips when the Bridgefoot delivery van draws up it could be because the van is running on recycled cooking oil. (Or it could be that the driver has stopped off at the chipper). The green van (Tara's van) has been using recycled cooking oil for two months. Given the success of this it is intended to run Dominic's and Chris's vans on bio-fuel in the near future.

Best wishes for Christmas and the New Year from all at BRIDGEFOOT
